

## Asterisk Project Security Advisory - AST-2018-008

<b>Product</b>	Asterisk
<b>Summary</b>	PJSIP endpoint presence disclosure when using ACL
<b>Nature of Advisory</b>	Unauthorized data disclosure
<b>Susceptibility</b>	Remote Unauthenticated Sessions
<b>Severity</b>	Minor
<b>Exploits Known</b>	No
<b>Reported On</b>	April 19, 2018
<b>Reported By</b>	John
<b>Posted On</b>	June 11, 2018
<b>Last Updated On</b>	June 12, 2018
<b>Advisory Contact</b>	Rmudgett AT digium DOT com
<b>CVE Name</b>	CVE-2018-12227

<b>Description</b>	When endpoint specific ACL rules block a SIP request they respond with a 403 forbidden. However, if an endpoint is not identified then a 401 unauthorized response is sent. This vulnerability just discloses which requests hit a defined endpoint. The ACL rules cannot be bypassed to gain access to the disclosed endpoints.
--------------------	--

<b>Resolution</b>	Endpoint specific ACL rules now respond with a 401 challenge which is the same as if an endpoint were not identified. An alternate is to use global ACL rules to avoid the information disclosure.
-------------------	--

<b>Affected Versions</b>		
<b>Product</b>	<b>Release Series</b>	
Asterisk Open Source	13.x	13.10.0 and later
Asterisk Open Source	14.x	All releases
Asterisk Open Source	15.x	All releases
Certified Asterisk	13.18	All releases
Certified Asterisk	13.21	All releases
