Product	Asterisk
Summary	pjproject: undefined behavior after freeing a dialog set
Nature of Advisory	Denial of service
Susceptibility	Remote unauthenticated sessions
Severity	Major
Exploits Known	Yes
Reported On	March 3, 2022
Reported By	Sauw Ming
Posted On	March 4, 2022
Last Updated On	March 3, 2022
Advisory Contact	kharwell AT sangoma DOT com
CVE Name	CVE-2022-23608

Description	When acting as a UAC, and when placing an outgoing call to a target that then forks Asterisk may experience undefined behavior (crashes, hangs, etc…) after a dialog set is prematurely freed.
Modules Affected	bundled pjproject

Resolution	If you use "with-pjproject-bundled" then upgrade to, or install one of, the versions of Asterisk listed below. Otherwise install the appropriate version of pjproject that contains the patch.

Affected Versions		
Product	**Release Series**	
Asterisk Open Source	16.x	All versions
Asterisk Open Source	18.x	All versions
Asterisk Open Source	19.x	All versions
Certified Asterisk	16.x	All versions

Corrected In

Product	Release
Asterisk Open Source	16.24.1,18.10.1,19.2.1
Certified Asterisk	16.8-cert13
